Dear Colleagues,

We are glad to inform you that the preparation stage of WEEM-2019 has passed successfully: many top experts and young participants announced their intention to participate in this meeting. Effectively, we have received over 110 submissions. This shows that WEEM-2019 enjoys a high attraction.

The number of requests for oral presentations (83) turned out to be much higher than the maximum number of available time slots. The tradition of all WEEM conferences is to dedicate about half of the session time to discussions. This represents one of the most important features of this **workshop**. Each member of the Scientific Committee and the Advisory Board of WEEM evaluated independently all abstracts submitted for oral presentation. The total score of each presentation represented the principal criterion determining its final status. These evaluation results are distributed now among all corresponding authors of presentations.

In view of the high scientific prestige of this series of workshops the International Society of Electrochemistry (**ISE**) has granted its sponsorship to WEEM-2019, on the basis of the positive assessment by ISE Divisions 1 and 4. WEEM-2019 has also been supported by a conference grant of **Bulgarian Science Fund**.

Borovets and Workshop venue:

Borovets is situated about 70 km southwest from Sofia in the foot of Rila mountain. Borovets, known as Chamkoria until the mid 20th century, is the first mountain resort of its kind, in Bulgaria and on the entire Balkan range. Its origin dates back to 1896, when Kniaz Ferdinand – Bulgaria's monarch at the time, had his summer residence and several hunting lodges built there. His example was followed by aristocrats and members of the Bulgarian elite, who subsequently built their summer cottages and chalets in Borovets. In the 60s and 70s, the resort expanded to become the largest winter sports centre on the Balkans – new ski drags and lifts were erected, the ski slopes were widened and numerous alpine-style hotels were built. Today Borovets is a modern four-seasons resort with an excellent network of ski slopes and lifts, cosy alpine hotels at the backdrop of breath-taking nature.

The workshop will take place in **Hotel Rila** (<http://www.rilaborovets.com/en>) . The hotel provides comfortable accommodation, suitable conference facilities, and opportunities for good relaxation:

- single and double rooms to accommodate all workshop participants in the same hotel
- new conference and events center with 8 meeting rooms
- several restaurants and a lobby bar
- in-door swimming pool and hot tub with direct view to the mountain

Travel Information.

By workshop organized transport: There is no direct regular public transportation between Sofia (in particular, Sofia airport) and the conference place (Borovets). The transportation of all participants arriving at Sofia airport will be arranged by bus/microbus according to the flight schedules. All information concerning arrival/departure should be communicated to New Event Company, the partner in the workshop organization (see **Accommodation, full board and transportation** below).

By public bus: Every 30 minutes, a bus departs from South Bus Station (Avtogara Yug), Sofia to Samokov Bus Station (duration: 1 hour). The easiest way to reach avtogara Yug from Sofia airport is to take a taxi.

A shuttle service from Samokov to Borovets is available every 30 minutes. In Borovets, the shuttle stops in front of Hotel Samokov. On the way back from Borovets to Samokov Bus Station, the shuttle leaves from the Hotel Ela in Borovets.

Visas and Formal Invitation Letters

All participants that need visas for their stay in Bulgaria will be provided with Invitation letters. Please fill the necessary information in the registration site of New Event
